

ACTIVE COMMUNITY PARTICIPATION TRAINING AND RESOURCES FOR PEOPLE WITH FUNCTIONAL DIVERSITY

Sometimes disabled people are isolated from their communities and lack opportunities to play an active role in them, either because of the physical barriers caused by disabilities, because they live in remote places or because of the situation derived from the COVID pandemic.

When people face this problem, the use of technologies could be a very useful tool to overcome the physical barriers and ensure their full participation in society on an equal basis with others.

WHAT IS OUR MAIN GOAL?

The main goal of the Activate project is to *train adults with disabilities to enhance their digital skills and competences*, so they can overcome the physical barriers and have a *community participation*, maintain their *independence* and achieve a *better quality of life*.

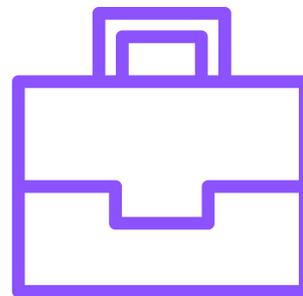

To reach this purpose, the Activate project also seeks to *provide professionals working with people with disabilities with the necessary resources and tools*, in order to *help them to take advantage of the digital tools*.

HOW ARE WE GOING TO ACOMPLISH IT?

PROJECT RESULT 1

A *training course* on online community action and social participation mechanisms, aimed at people with disabilities.

PROJECT RESULT 2

A *toolkit* to give professionals the necessary tools so they can raise awareness among the people they work with and show them the opportunities that digital and online tools can offer for them to be active in their communities.
